Qualified Facilities

08-Oct-04

DRMS has reviewed these facilities in the past and has no reason to believe that they do not meet the standards specified in DRMS contracts. Inclusion of facilities to the Qualified List does not constitute a determination of the acceptability of these facilities for the requirements of any specific DRMS contract or relieve the contractor of any responsibility for performing specific DRMS contracts in accordance with each contract's terms and conditions.

"HW" Facilities are RCRA permitted TSDFs qualified for RCRA and non-RCRA wastes.

"NR" Facilities are non-RCRA facilities qualified for non-RCRA wastes. Occasionally, when authorized by the applicable regulatory authority, "NR" facilities may be qualified for select RCRA or state regulated hazardous wastes.

"PCB" Facilities are TSCA permitted facilities qualified for PCB wastes.

"HWP" Facilities are both TSCA and RCRA permitted facilities qualified for PCB, RCRA and non-RCRA wastes.

C.37 - Facilities with a "37" are those facilities which have a current DRMS approved Fuels Blending Plan. Updated version required every January.

C.68 - Facilities with a "68" are those facilities which have a current DRMS approved Battery Recycling Plan. Updated version required every January.

C.72 - Facilities with a "72" are those facilities which have a current DRMS approved Fluorescent Light Plan. Updated version required every January.
