**NOTE 1:** Exception to the requirement - An LSN may be assigned to property when the materiel has not been assigned a formal NSN, i.e., if it is considered lost, abandoned, unclaimed, confiscated privately owned personal property, captured enemy materiel or for reasons of special processing by the generating activity (e.g., incomplete end item such as chemical defense equipment kits after removal of hazardous constituents).

**NOTE 2:** If the property qualifies as an exception, the DTID will contain the appropriate FSC, the valid part number, manufacturer's name, nomenclature which accurately describes the item, end item application, and a clear-text statement defining the reason for the LSN assigned.

**NOTE 3:** DRMOs will reject property that does not meet the stated reporting requirements. Repeated rejection of materiel because of this policy will be reported by the DRMO to DRMSN/I.

\* Disposal of FSC 5810/5811 equipment, which is classified or designated **COMSEC/CCI** is the responsibility of the **turn-in activity and/or owning military service**. (See DoD 4160.21-M, Chapter 3, Attachment 2.) **27 Jun 2003**
